Casper College

Weekly Workout

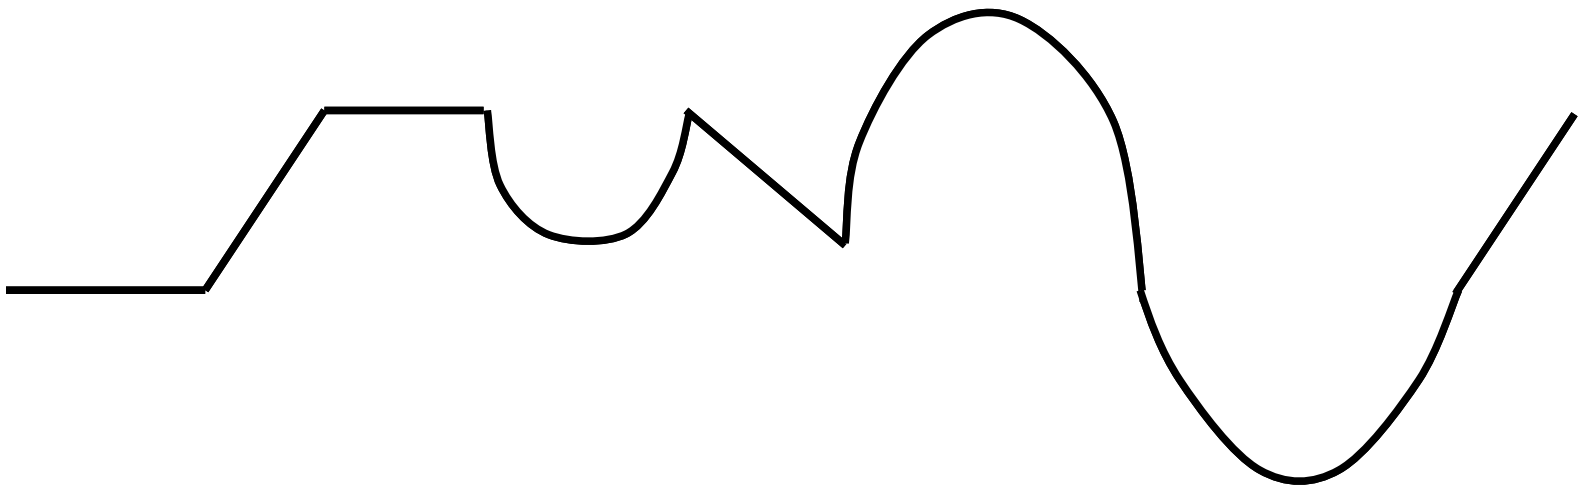

Plan:

- Weekly math-themed story problems
- Introduces different writing styles
- Encourages creativity and problem solving
- Make connections between math and English
- Better strategies make better communicators.

Narrative Paragraph

- Student will brainstorm and write a narrative paragraph describing the “story” of this graph.
- Students learn to observe trends by “reading” graphs from left to right.

Exemplification Paragraph

- Students will be given a topic sentence
- They will generate an examples and details to support the topic
- Numeric details must be included

Topic Sentence: Being a dog owner means more than just having a buddy.

In the Works

- Process – explain how to determine GPA
- Compare / Contrast – cell phone plans
- Definition – what is a good math student
- Cause and Effect – correlation between attendance and overall grade
- Division / Classification – food pyramid and nutrition labels
- Description – polyanimals
- Argumentative – consumer story problem
